LED line[®] Panel 2in1

Twice the savings and hybrid mounting

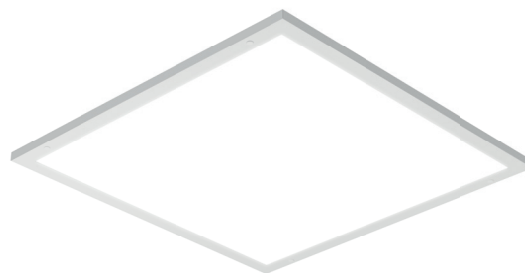

Panel 2in1 from the LED line® series was developed with simple, quick installation and beautiful looks in mind. The capability of mounting in suspended ceiling systems and on surfaces reduces the costs of the entire lighting point. The manufacturer provides a 5-year warranty and twice the savings in effort and money.

KEY FEATURES:

- ▶ Quick surface mounting without frames
- ▶ Energy efficient (120 lm/W)
- ▶ Flat (16 mm), integrated power supply unit
- ▶ Hybrid mounting in suspended ceiling systems and on surfaces
- ▶ Wattage: 30W, Correlated colour temperature: 4000K
- ▶ 5-year warranty

LED line® Panel 2in1

Product reference: 478481

▶ No-frame installation – quick and efficient

The product provides the option of hybrid mounting in a suspended ceiling system or on a surface – no frames needed. It's a huge time and money saver for installers – the installation is lightning quick. Instead of 20 regular framed panels, one installer can mount up to 50 2in1 fixtures in one day

▶ FLICKER FREE™ system – safety for the eyesight

LED Line® Panel 2in1 guarantees zero harmful light flickering effect and safety for the users' eyesight. The colour temperature is 4000 K. It's the natural light colour, the most beneficial for the human eye.

▶ High efficiency and durability

The product achieves light output of at least 120 lm/W. It gives a lot of light, while drawing little current – its power is 30 W. The product's housing is built in line with modern Yellow Free technology, which prevents it from yellowing and keeps the slick appearance for years.

▶ Easier installation

The solution works well in schools, offices, business spaces. Cutting-edge solutions save the installer both time and money. The product also features a power supply unit integrated into the panel's housing, which is just 16 mm thick.
