STREETLITE

Symbol: 201064, 201071, 201088

STREETLITE – perfect visibility at every step.

Lighting of roads, squares, parking lots, terraces, spaces in front of properties or utility facilities plays a key role in ensuring a safe and comfortable environment. With STREETLITE luminaires, you can provide all of this at a great price!

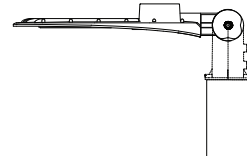

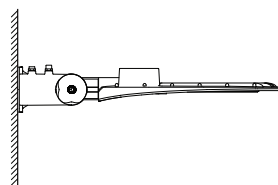

Where will STREETLITE luminaires work the best?

- on squares,
- in parking lots,
- on streets,
- in park alleys,
- on residential roads,
- on private properties and farms.

Thanks to its small and light structure, the installation and placement of the luminaire become easy and convenient. The adjustable mounting element allows you to freely rotate the product 180 degrees, which allows you to direct the light anywhere from the selected position. Thanks to this, you have full control over the lighting and can precisely illuminate each area according to individual needs.

It is also worth noting that the STREETLITE luminaires can be easily mounted not only on the mast (of 48–60 mm diameter), but also directly to the walls of buildings. This makes them an extremely flexible solution that can be adapted to different structures and architecture of the environment.

Technical parameters of STREETLITE luminaires:

- 3 types of power: 50 W 100 W 150 W
- Luminous efficacy: 100 lm/W
- Protection class: IP65
- Colour temperature: 4,000K
