FOR THE MOST DEMANDING APPLICATIONS

ALU POWER SUPPLIES

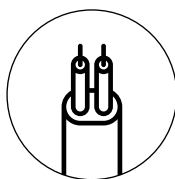

For the most demanding projects, we have developed the LED line PRIME ALU power supplies — professional 24V DC units with power ratings of **300W** and **400W**, designed for maximum performance, safety, and reliability.

Thanks to their high efficiency and **PF >0.95** power factor, they effectively minimise energy losses and ensure stable operation even under heavy loads.

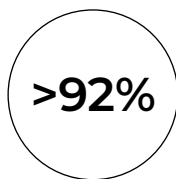

The robust aluminium housing guarantees efficient heat dissipation, while the **IP67 protection rating** enables safe operation in the most demanding environments. Two independent current outputs facilitate quick installation and connection of extensive lighting systems.

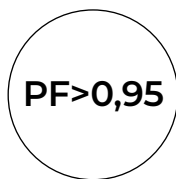

Complete resistance to dust and moisture

Two independent current outputs

Efficiency exceeding 92%

Full power utilisation without energy loss

POWER SUPPLY ALU IP67

CECHY GŁÓWNE

- ▶ 300W and 400W power variants
- ▶ Stable 24V DC output voltage
- ▶ Two independent current outputs
- ▶ High efficiency >90% — more power, lower losses
- ▶ PF >0.95 — maximum energy utilisation
- ▶ IP67 protection rating — full protection against water and dust
- ▶ Robust aluminium housing
- ▶ Excellent heat dissipation

EFFICIENCY
>92%

Power [W]:
300, 400

Protection rating:
IP67

Output voltage [V DC]:
24

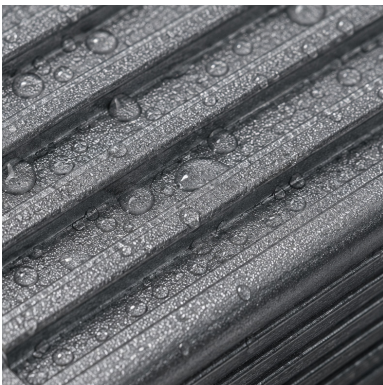

Power factor [PF]:
>0.95

Dimensions [LxWxH]:
260x78x34, 280x78x34

Housing:
aluminium

DESIGNED WITH YOUR PROJECT IN MIND

ALUMINIUM IP67 HOUSING

The durable premium-grade construction ensures effective heat dissipation and full protection against water, dust, and demanding working conditions.

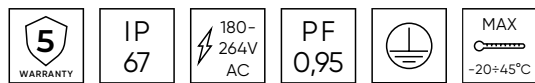

TOP-TIER PERFORMANCE

High efficiency, performance, and protection rating combined into one complete solution.

TWO OUTPUT CABLES

Two independent current outputs enable faster and more convenient connection of extensive installations, increasing installation flexibility.
