## HIGH-BAY ECOBEAM - Efficient and economical reliable lighting.

HIGH-BAY ECOBEAM is a cost-effective, efficient industrial LED light with robust performance. The product provides bright, comfortable light with an efficiency of 100lm/W. It is the optimal lighting choice for production halls, warehouses, sports halls and other industrial spaces.

## Tailor-made and reliable in all conditions

The reliable HIGH-BAY ECOBEAM lighting is available in three wattage variants (100 W, 150 W and 200 W), allowing flexibility to meet a variety of lighting needs. The bright light with a color temperature of 4000K provides eye-friendly illumination that promotes focus, which is especially important in production and warehouse environments.

## Resistant to damage and comfortable to use

The shade made of tempered glass provides additional protection against mechanical damage and disperses the light evenly. This makes the use of HIGH-BAY ECOBEAM lighting more comfortable and work safer. In addition, the luminaire with IP65 protection guarantees complete protection against dust and water, which makes the product perform well in harsh environments. Durability is confirmed by a 3-year warranty.

## Efficient and economical in operation

Efficiency of 100 lm/W make the LED line LITE HIGH-BAY ECOBEAM lamp an excellent choice for industrial spaces. Not only in terms of energy savings, but also because of its exceptional operating efficiency, which can translate into reduced costs related to electricity consumption.
