Higher energy **efficiency**, lower **energy** consumption

We invite you to discover new products in our offer – PRIME line LED power supplies. Available in various models and configurations, they are the ideal solution for customers looking for reliable and energy-efficient power supplies. They are used in decorative backlighting systems in furniture and interior finishes, offering a wide range of design possibilities.

Key features of PRIME line pulsed LED power supplies:

The availability of a full cross-section of 12V and 24V series provides the customer with flexibility and the ability to tailor the power supply to the specific needs and requirements of the lighting system.

A high Power Factor = 0.9 means higher energy efficiency, which translates into many benefits, such as reduced energy losses, increased efficiency of the power grid and lower electricity costs.

IP67 guarantees reliable operation even in harsh weather conditions. Resistance to water and steam increases the safety of the lighting system and eliminates the risk of failure.

The power supplies are **compliant with EMC 55015**, which proves that they meet the requirements for electromagnetic compatibility: they do not interfere with their operation in the context of interference, do not interfere with the operation of other devices, and at the same time are immune to the emissions of other devices (that meet the objectives of EMC).

The 5-year warranty ensures that the power supplies are of high quality and reliable. In addition, the long warranty shows the manufacturer's confidence in its own products.

The housing material - plastic, ensures the lightness and durability of the power supply. Power supplies are equipped with long current cables ~20cm. Dimensions depend on the particular model and its power.

In addition, the functional printed packaging makes it easy to store on the shelves in the wholesaler, allowing you to conveniently and quickly select the right power supply without having to search through the entire assortment, which increases work efficiency and saves time.

All available models:

Symbol	Name
LL-12-12	Power supply LED line PRIME 12-12 IP67 12V
LL-12-24	Power supply LED line PRIME 12-24 IP67 24V
LL-20-12	Power supply LED line PRIME 20-12 IP67 12V
LL-20-24	Power supply LED line PRIME 20-24 IP67 24V
LL-35-12	Power supply LED line PRIME 35-12 IP67 12V
LL-35-24	Power supply LED line PRIME 35-24 IP67 24V
LL-60-12	Power supply LED line PRIME 60-12 IP67 12V
LL-60-24	Power supply LED line PRIME 60-24 IP67 24V
LL-75-12	Power supply LED line PRIME 75-12 IP67 12V
LL-75-24	Power supply LED line PRIME 75-24 IP67 24V
LL-100-12	Power supply LED line PRIME 100-12 IP67 12V
LL-100-24	Power supply LED line PRIME 100-24 IP67 24V
LL-150-12	Power supply LED line PRIME 150-12 IP67 12V
LL-150-24	Power supply LED line PRIME-24 IP67 24V
LL-200-12	Power supply LED line PRIME 200-12 IP67 12V
LL-200-24	Power supply LED line PRIME 200-24 IP67 24V

Main product features:

- Voltages: 12V and 24V
- Power Factor = 0,9
- Waterproof: IP67
- Standard: EMC 55015
- Warranty: 5 years
- Material: plastic
