Spend less, get more! Choose the versatile BACKLIT LED line LITE panel!

The Backlit LED line LITE panel is another addition to the LED panel family. Thus, we have expanded our range of lighting solutions with another multi-purpose fixture that guarantees high quality at a good price.

LED line LITE Backlit Panel is a fixture with a robust design and lighting parameters that provides energy efficiency and stable operation throughout its lifetime.

The LED line LITE series Backlit fixtures provide a trouble-free service life of 30,000 hours. Also, the 3-year warranty provides peace of mind. In backlit designs, the LEDs are positioned at the back of the body, resulting in a high and uniform light output, providing comfortable illumination of the intended space.

What does the LED line LITE Backlit fixture provide?

- luminous efficiency of 100 lm/W, based on SMD 2835 LEDs
- high performance – the fixture consumes 40 W of power to deliver a light output of 4000 lm
- robust housing, ensuring bending and deformation strength
- smooth operation for 30,000 hours
- 3-year warranty

The fixture is well suited for offices or public buildings, such as town halls, schools and healthcare facilities. Its benefits will also be appreciated by users of commercial spaces and residential buildings.
