CONNECTORS for LED strips

LED STRIPS ACCESSORIES

FAST-CONNECTOR CONNECTORS

Key features:

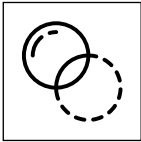

- ▶ Transparent design – high installation aesthetics
- ▶ Simple and quick strip connection
- ▶ Compatible with both COB and SMD strips
- ▶ 9-in-1 connector for all types of connections
- ▶ Convenient 10-piece packaging

Application:

- ▶ Connectors designed with versatility in mind – suitable for any LED installation, regardless of location, strip type (COB/SMD), or mounting configuration. One solution for all applications: furniture, ceilings, recesses, advertisements, stairs, or decorative constructions.

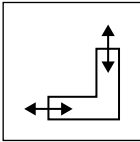

Fast-Connector type connectors

Fast-Connector is a technology designed with the convenience and aesthetics of modern installers in mind. It enables quick, intuitive LED strip installation – and most importantly, it requires no tools. You save time and avoid frustration. These universal connectors are compatible with nearly any setup, regardless of location or mounting type. The well-thought-out design ensures a durable and tidy connection, with no compromise on quality.

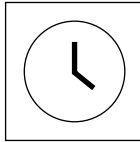

Connection aesthetics

The transparent design of the connectors ensures maximum connection aesthetics, allowing the connector to blend seamlessly into the LED strip line.

Variety of models

From simple connections to corners and multifunctional solutions. A standout among them is the 9-in-1 connector, which combines the functions of several models into a single connector.

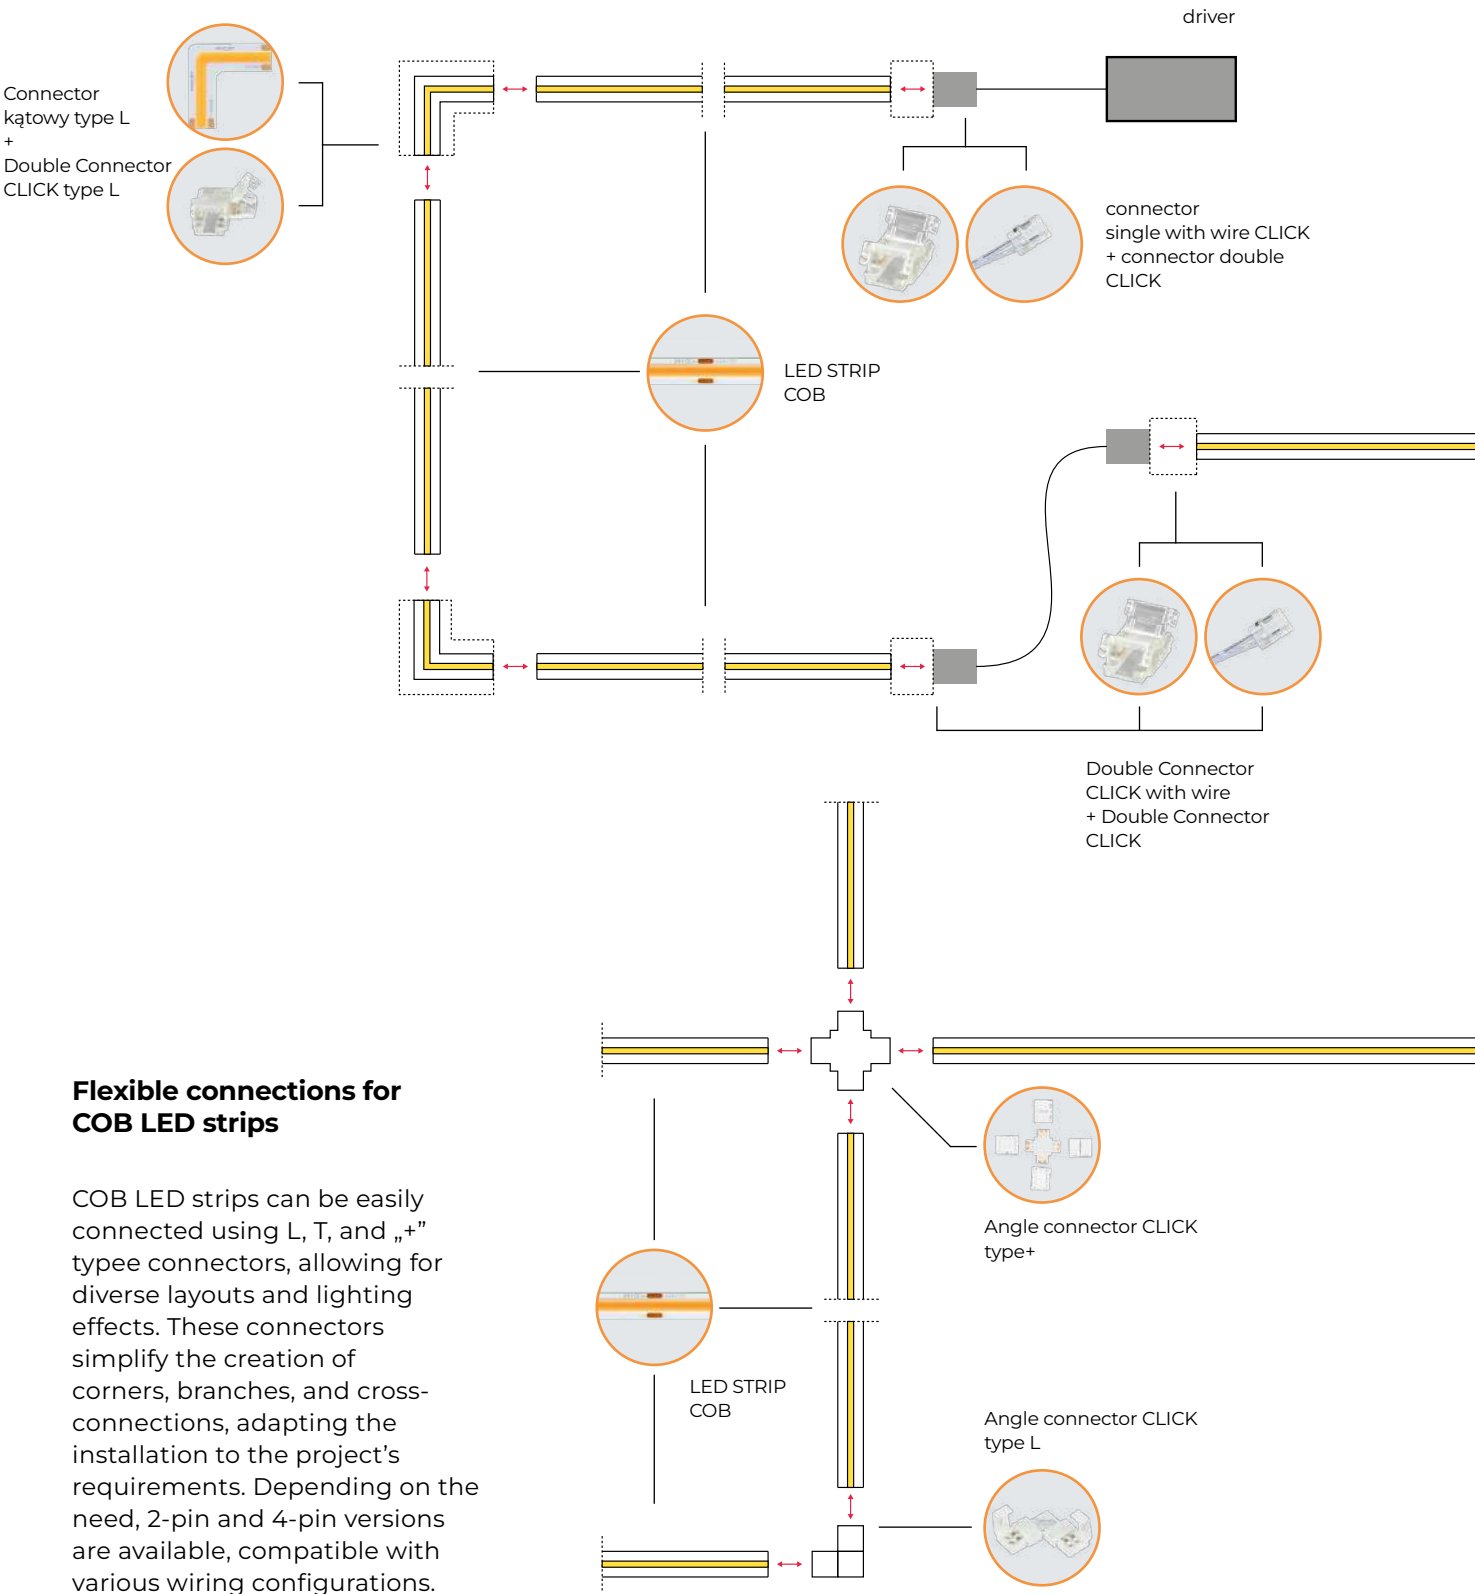

Quick installation

Fast-Connector connectors allow for instant LED strip connections without the use of tools – fast, secure, and solder-free.

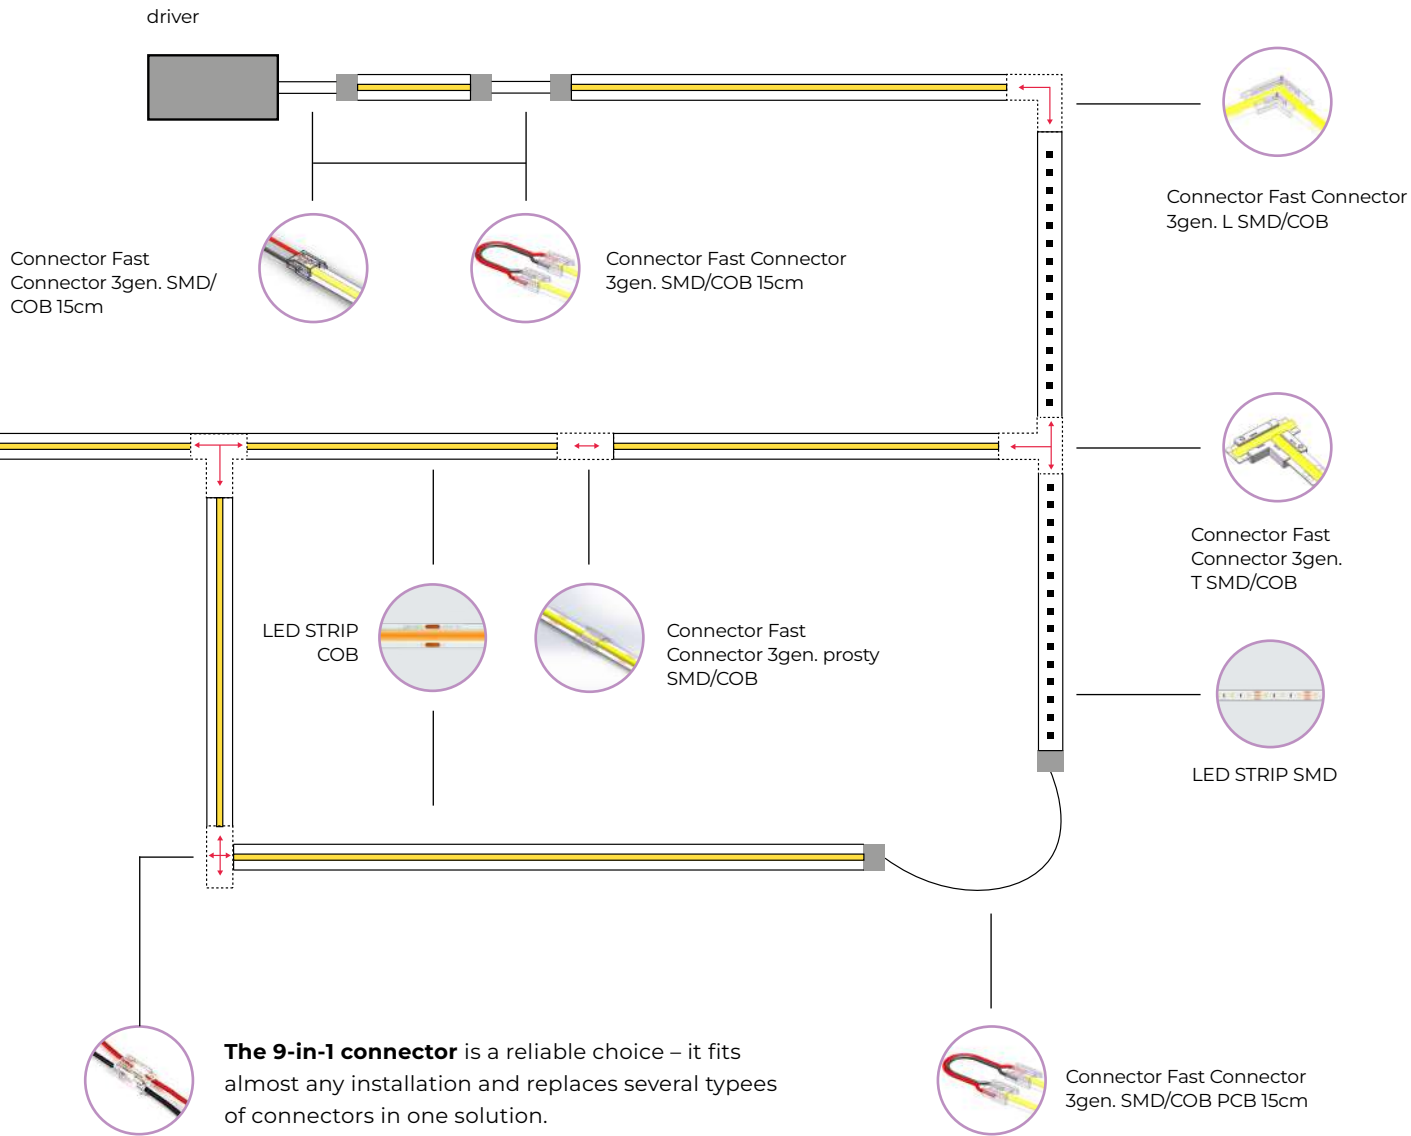

CLICK-type connectors

CLICK connectors are a standard, proven solution for quick and reliable LED strip connections. Their classic design allows for easy, solder-free installation, while broad compatibility makes them ideal for typical lighting setups. A simple choice when reliability and functionality matter most.

Fast-Connector 3rd Gen connectors

3rd generation Fast-Connector connectors feature a transparent housing that ensures a clean, aesthetic connection, as well as universal compatibility – suitable for both COB and SMD strips. Their biggest advantage is ultra-fast, tool-free installation, which significantly speeds up the installer's work.

9in1
Great in every situation!
