MERRYTEK power supply LED/motion sensor On/Off/dusk MLC18C-P3

The hybrid power supply MLC18C-P3 combines LED power with a reliable sensor that responds to both motion and dusk. It is responsible for precisely turning on the light point only when it detects someone's presence in the face of too weak natural lighting. The entire system operates in a binary ON/OFF mode, without support for smooth regulation of light output using DIM protocols. Packing the power supply and sensor into one sealed box saves valuable space inside the designed lamps. This assembled system is a proven foundation for building smart wall lamps for modern residential complexes.

Technical data

Parameter	Value
Warranty	5
Voltage	• 220-240 V AC
IP protection rating	IP20

Parameter	Value
Frequency of the supply voltage	50/60Hz
Ambient temperature suitable for operation	-25?~50?
