MERRYTEK power supply LED/motion sensor On/Off/dusk MLC18C-N

The MLC18C-N power supply with a detector is a highly cost-effective system designed for automating basic lighting in corridors. The built-in microwave module continuously monitors the environment around the fixture, reacting instantly to moving objects in the detection area. The twilight sensor will block the activation of the light during the day, thus maximizing the user's electricity savings. It is a device that is simple to install, operating in a fault-free system of complete on or off voltage. Its compact dimensions encourage fixture manufacturers to use it in all small spots and small ceiling lamps.

Technical data

Parameter	Value
Warranty	5
Voltage	• 220-240 V AC
IP protection rating	IP20

Parameter	Value
Frequency of the supply voltage	50/60Hz
Ambient temperature suitable for operation	-25?~50?
