MERRYTEK power supply LED/motion sensor On/Off/1-10V DIMM MLC20C-P2

MLC20C-P2 is an innovative 2-in-1 device that integrates the functions of an LED power supply and a microwave motion sensor. The equipment features a classic ON/OFF activation option as well as a smooth dimming function in the 1-10V standard. The combination of both modules in one housing drastically reduces the amount of internal wiring within the light fixture and speeds up production. The power supply reliably drives the LED modules, while the sensor ensures that power is only activated in response to the presence of people. This is a product that is eagerly installed in popular ceiling lights intended for staircases and corridors.

Technical data

Parameter	Value
Warranty	5
Voltage	220-240 V AC
IP protection rating	IP20

Parameter	Value
Frequency of the supply voltage	50/60Hz
Ambient temperature suitable for operation	-25?~50?
