

LED line® strip 1500 SMD 12V 6500K
21W SPOTLESS

LED Strip line is a modern and versatile linear **light source**, used for interior lighting, furniture, lightboxes, illuminated signs, and public spaces.

The colour temperature range of the product falls within 3 steps of MacAdam formula, which ensures high consistency of the produced light.

High Colour Rendering Index ensures that the colour of illuminated objects/surface is truly revealed.

By significantly increasing the number and density of LEDs placed on the LED line® SPOTLESS strip, a continuous line of light has been achieved, which in combination with the aluminum profile allows to create the ideal single luminaire without any visible dots of light.
