MULTIPOWER Master Sensor Hand Motion On/Off

The LED line sensor Master Sensor Hand Motion On/Off is an innovative device that works with LED line power supplies. Its key function is to automatically turn on the light source when the hand movement is detected at a distance of 5-7 cm. It works on a proximity sensor basis, allowing comfortable lighting control without having to touch the element. The sensor cable is 1.5 m long, which facilitates its installation in different locations.
